

Housemate Helper

Team: OVO

Release 1.0: 11/30/21

Revision 1: 10/5/21

Release Plan

High Level Goals:

- To develop a working proof of concept of a web application, “Housemate Helper”.
- At the very least, have a working prototype of the application
- Have an open system capable of future integrations
- Maintain a website that host the application
- Help housemates create and maintain a schedule for chores
- Track shared expenses between all housemates
- Have a calendar where housemates can post their schedules and events

User Stories:

Sprint 1:

- As a housemate, I want to be able to create an account and login so that I can use the application as a whole.
- As a housemate, I want to be able to create a house group so that my housemates can join.
- As a housemate, I want to be able to join a house so that I can coordinate and use the features of the app with the rest of my housemates.

Sprint 2:

- As a housemate, I want to create new chores so that I can assign a housemate to do each chore.
- As a housemate, I want to be able to assign housemates to chores so that I can establish a schedule for getting the chores done.

Sprint 3:

- As a housemate, I want to be able to add expenses so that my other housemates know how much is being spent.

Sprint 4:

- As a housemate, I want to be able to make sure that if I misspell anything entered into the app, the app will let me know and ask me to try again.

Product Backlog:

Goals:

- Allow locations of housemates to be shared with each other
- Be able to post anonymous posts to a board

User Stories:

- As a housemate, I want to be able to post anonymous messages to a board, so that I can notify and remind my housemates of things without having to confront them.
- As a housemate, I want to be able to find the location of my other housemates on the application so that I can find them just in case of an emergency.
- As a housemate, I want my location to be shareable with my housemates so that I can be found in case of an emergency.
